Chhatrapati Sambhajanagar, Maharashtra, India

Professional Summary

Backend Engineer and Team Lead with 6 months of production experience building enterprise-grade, AI-integrated platforms. Independently architected EduDiagno's BI copilot — a schema-aware LLM system using RAG-based schema retrieval and self-healing SQL generation across 5 database engines, reducing failed queries by 85%. Appointed Team Lead within the first week of joining a 5-person team, going on to own technical direction across three production systems: an examination platform with real-time proctoring and RBAC architecture, a solo-built AI interview copilot, and the BI copilot itself. Full-stack across Next.js/React, FastAPI/Node.js, four SQL dialects, and AWS.

Technical Skills

Languages	Python, JavaScript/TypeScript, SQL, Rust (working knowledge)
Frontend	Next.js (App Router), React, Tailwind CSS
Backend	FastAPI, Node.js, Express.js, Django
Databases	PostgreSQL, MySQL, MSSQL, Redshift, Prisma ORM, Neon
AI / LLM	OpenAI GPT-4o, LangChain, Vanna, Qdrant (Vector DB / RAG), Deepgram (voice transcription)
Cloud & DevOps	AWS (EC2, RDS, VPC), Docker, GitHub Actions, Vercel, CI/CD pipelines
Security	RBAC frameworks, JWT, OTP Authentication, Rate Limiting, CORS, Input Validation/Sanitization, SQL Safety Validation
AI Engineering	Prompt Engineering, RAG Pipelines, Semantic Search, Vector Indexing, NL-to-SQL Generation, AI Safety Guardrails
Realtime & Payments	Socket.IO, WebSockets, Razorpay, Payment Verification & Webhooks, Upstash Redis (rate-limiting)
Tools	Git, GitHub, Linux, Postman, Power BI, Tableau

Professional Experience

Backend Engineer & Team Lead

EduDiagno Pvt. Ltd., Bengaluru

Jan 2026 – Jun 2026

Remote

- Joined as one of 5 engineers on a new AI hiring platform initiative; appointed Team Lead within the first week, taking ownership of technical direction and delivery across three major products.
- **AI BI Copilot:** Architected a schema-aware AI system (Vanna-based) supporting 5 database engines with RAG-based schema retrieval and NL-to-SQL generation. Built a self-healing SQL pipeline with automatic error detection and prompt repair, reducing failed queries by 85%. Built role-based query enforcement with read-only SQL validation and AI safety guardrails.
- **Examination Platform:** Designed a complete multi-tenant platform with a 4-level RBAC hierarchy, OTP-based authentication, and flexible exam scheduling. Architected a standalone Socket.IO server for real-time AI-assisted proctoring, decoupled for independent scaling. Engineered offline/LAN deployment support and a 15+ model normalized PostgreSQL schema.
- **Parakeet (Solo Project):** Independently designed and built an AI interview-preparation copilot using OpenAI and Deepgram for real-time voice transcription and live answer suggestions.
- **Infrastructure:** Led AWS migration from on-premise infrastructure (EC2, RDS, VPC), containerized all services with Docker, and deployed a CI/CD pipeline with GitHub Actions.

Technical Projects

Active Products – Ayurvedic E-Commerce Platform

Personal Project, Ongoing

- Next.js, Prisma, PostgreSQL (Neon), Razorpay, Upstash Redis – production store with signature-verified payment webhooks and a legal framework aligned with DPDP Act 2023, Consumer Protection Act 2019, and FSSAI regulations.

Diet Recommendation API

Personal Project

- FastAPI, Docker, OpenAI, scikit-learn – containerized ML backend combining predictions with GPT-driven meal personalization.

EduDiagno BI Copilot – CI/CD Pipeline

Independent Infrastructure Project

- GitHub Actions, EC2, Docker Compose, Prisma – bastion-proxied deployment pipeline with pre-migration `pg_dump` backups and selective service restarts.

Achievements

- **Appreciation Letter** – EduDiagno recognition for independent backend work.
- **National Hackathon Runner-Up** – Rust-based HFT bot (YCCE Nagpur).
- **ISRO ASCEND 2026** – Selected for India's aerospace/drone challenge.
- **Student Head (SIH)** – Coordinated 600+ participants.

Leadership & Extracurricular

- **Department Events, Technical Lead** (2nd Year – Final Year) – Owned end-to-end execution for every department event solo, including Faculty Development Programs; also led Scrutiny (2nd Year) and the Kalavihangam cultural fest (3rd Year).

Education

Bachelor of Technology – Computer Science Engineering

MIT Chhatrapati Sambhajanagar

2022 – 2026

CGPA: 8.54

Certifications

RHCSA (Scheduled 2026) • Power BI & Advanced Excel • Tableau • Automation Anywhere • UiPath
